

TAKE ADVANTAGE OF UNMATCHED ENERGY EFFICIENCY

Proven energy-efficient drive trains

Advanced electrical drive trains enable vessels to take advantage of variable speed and full power. They revolutionize the way ships generate and use energy. Best of all, they improve a vessel's profit margin and allow it to cut emissions.

Our solutions are based on exceptionally rugged and world-renowned components with a strong track record in other demanding industries.

Permanent performance

Permanent magnet machines from The Switch can either be used as a generator or a motor.

Dedicated solution provider

WE Tech's variable frequency drive technology, integrated inside the DC-link switchboard, provides ships with unmatched energy efficiency in electrical power generation.
